## Spostaluce Kit with E27 lamp holder for lampshade Finish: White

### Description

The E27 Spostaluce Kit offers an optimal solution for those passionate about lighting design, helping them create customized illumination systems tailored to any setting, with or without pre-existing light sources.

What sets this kit apart from others?

The E27 Spostaluce kit for lampshades is designed with a widely compatible fitting for most market-available light bulbs and all 2x0.75 fabric cables. These features enable you to create your preferred configuration in any room. Installation is exceptionally straightforward, as the Spostaluce is designed to connect directly to an electrical outlet. Available in white and black options.

Attaching the lampshade

The Spostaluce kit with E27 lamp holder is suitable for lampshades: simply unscrew the ferrule, insert the chosen lampshade, and screw it back in to secure the lampshade. Its compact and minimalist design makes the kit suitable for any room or space, while the selected lampshade is sure to add energy and character.

What lamps can be created with the Spostaluce kit with E27 lamp holder for lampshade?

This versatile set will give you the freedom to create the lighting installation you're looking for, placing each light source exactly where you want it. The process is simple: just install the kit on the wall or ceiling and connect it to the fabric cables, plug, and E27 light bulb that best suit your personal taste and needs.
